

		Step 1	Step 2	Step 3	Total
Mathematical model development	Complete notation <i>All symbols used are defined. From one step to another, newly added symbols are only defined.</i>	5	3	3	35
	Complete and correct formulation <i>Mathematical formulations are well written. The variable set of every optimization model is defined. From one step to another, equations to be added/changed are explained only. If needed, equations are not repeated but their equation number is used.</i>	7	3	3	
	Complete description of the model <i>All the machine learning and optimization models are sufficiently explained.</i>	5	3	3	
Coding	Working codes <i>Codes are working and providing the same results as those in the report.</i>	0	6	6	25
	Efficient coding <i>Codes are written elegantly with commands and functions, in a way that they can be easily used for a large-scale realistic case study.</i>	0	4	4	
	Easy codes for others <i>There are comments throughout the codes and a helpful READ-ME file, making it straightforward for others to understand and run the code.</i>	0	2.5	2.5	
Results and discussions	Illustrations of “key” results <i>There is efficient illustration of results via figures and tables. The report successfully highlights key and insightful results.</i>	0	10	10	40
	Efficient discussion of results <i>There are thorough, non-trivial, and discussions with insightful analyses. The report draws concrete conclusions.</i>	0	10	10
